RELIABLE WIRELESS NURSE CALL SYSTEM

WIRELESS NURSE CALL

A nurse call system is a simple-push-of-the-button system for the patient or the relative to call the nurse. There is no wiring so room modifications are very easy at any stage.

Introducing the Solt Nurse Call system from Solt of South Korea. There is a host of convenient as well as required features to meet your current and future needs. But most of all, it is attractively priced.

- Excellent performance and reliability,
- Quick and efficient patient care service,
- Systematic Management for patient care service.
